

Returnable Packaging Solutions

Protect your products with
a reliable partner

At Eisen, we believe that outstanding engineers and technicians can make a positive impact on the world. This is why we support them in their efforts to go off the beaten path and provide the perfect packaging systems.

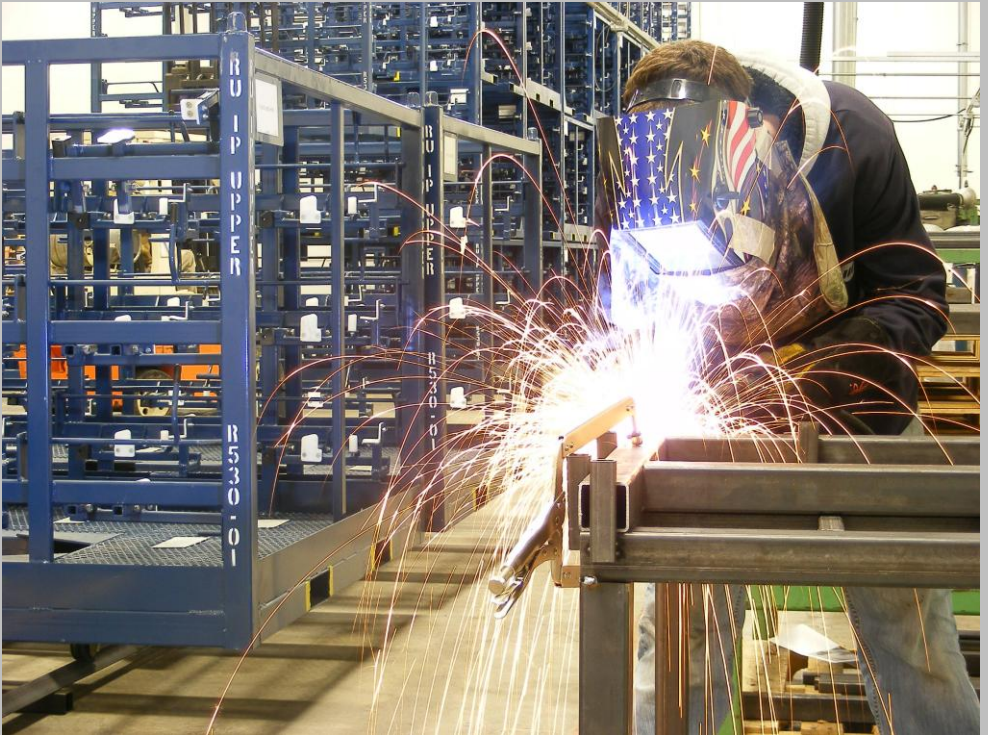

Fleet quantities

Whether you need small quantities for work in process, or large program fleet quantities, we have the specialized constructed facilities to meet your needs all year round.

Workmanship

Eisen's technicians and engineers take pride in our workmanship. It is through our work, that we feel empowered to be successful.

STEELRAK™ RETURNABLE FRAME CONTAINERS

48 x 45, 96 x 48, 96 x 78

Automotive Components ■ Plastics and Rubber

STEELRAK™ frame containers accommodate all types of parts storage and movement in assembly operations. Choose from a variety of container frame sizes that meet your application needs. This container group features four-way fork entry, two placards, and rugged cones/receivers for safe stacking. Quickship part numbers can be ordered in single quantities. Customize with your choice of dunnage and markings.

STEELRAK™ frame containers meet returnable containers guidelines for OEM plants. These containers will reduce trucking freight as well as floor space required when used for Work-In-Process applications.

48" x 45" STEELRAK™ RETURNABLE FRAME

Automotive Components ■ Plastics and Rubber

The STEELRAK™ 4845 Series is the standard for daily production shipments. It is compact enough to fit into any work cell and yields a high density per truck to reduce freight costs. Made from heavy duty 11 gage steel, these are supplied in standard blue color with two placards. Option to change colors and markings are available in large order quantities.

SteelRak™ 4845 Container Specifications (Inch and metric dimensions)

SteelRak™ Returnable Bag and Pcorr Racks

SteelRak™ Bag and PCorr racks accommodate all types of parts storage and movement in assembly operations. Choose from a variety of container heights to meet your application needs. This container group features four-way fork entry, two placards for labeling, and rugged top cones with bottom receivers.

STEELRAK™ containers meet returnable containers guidelines for OEM plants. These containers will reduce trucking freight as well as floor space required when used for Work-In-Process applications.

BAGRAK™ 4845-54 RETURNABLE BAG RACKS

476 Series

Automotive Components ■ Plastics and Rubber

The BAGRAK™ 4845-54 Series is the standard for daily production shipments. It is compact enough to fit into any work cell and yields a high density per truck to reduce freight costs. Made from heavy duty 11 gage steel with 4 way forks and 8x3 fork pockets, these racks are supplied in standard blue color with two placards. Option to change colors and markings are available in large order quantities. STEELRAK™ containers meet returnable containers guidelines for OEM plants. Commonly used for various plastic trim parts.

Ideal for these types of automotive trim parts
