

ENGINEERED FASTENERS FOR DEMANDING APPLICATIONS

A FOUR DIMENSIONAL COMPANY

EISEN has shown steady growth through the years as a direct result of its dedication and performance. This continued growth reflects the loyalty of an expanding customer base, earned through our focus on four major aspects of our business.

1 CUSTOMER ORIENTATION. Every member of the Eisen organization understands that the primary work objective is customer satisfaction. Only satisfied customers will assure the security and ongoing success of this company and its people. This fundamental premise is understood at every level of the Eisen Organization.

2 SERVICE. Fast, dependable response to inquiries on price and availability is essential to customer satisfaction. We have made a major investment in our Material Management system. You can get a formal quotation by return fax. Order your products with weekly releases, and receive advance shipment notices of deliveries as soon as these are shipped.

Sales & Engineering - Lansing, Michigan Sales and Engineering Office.

3 QUALITY. Companies now realize that a quality product saves money as well as reputation and sales. At Eisen, we assure our quality four ways:

- A. We do not compromise on raw materials
- B. We make most of our tooling in-house to very tight tolerances ensuring integrity between design and manufacturing.
- C. Our parts inspection follows a statistical process control (SPC) methodology. Our machines and gages have a maintenance plan. And we use the best measuring instruments available.
- D. All members of our staff and machinists have a quality conscious attitude.

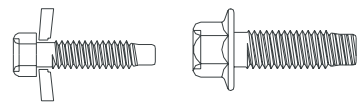

4 PRODUCT AVAILABILITY. EISEN is evaluating fastener products and specialists available throughout the world so that we can respond to our customers' needs with the widest range of fasteners available today.
